

## **Search & Rescue Event**

- If rescuers need to go up or down stairs in low visibility situations, have someone guide them with flashlight.
- If using smoke machines ensure that each team is getting the same amount of smoke (5 minutes once scenario started).
- When using live smoke have judges in full face respirators.
- When low visibility for judges have search judge use Tic Cam with spare battery always charging.
- No power out at fire grounds, ensure you have generator with enough fuel (think about having second generator as back up in case second one fails).
- When using Rescue Randy's as patience keep in mind reset and if possible use smaller Randy on second story or farthest point.
